

MOVING IMAGES

IN CREATECTRL WEBSUITE

If you want to have a preview of your video assets in CreateCtrl WebSuite for a better working experience, you can choose between the following options for the implemented videoplayer solution:

VIDEOPLAYER BASIC PACKAGE

For small business solutions

With small asset management systems you can choose a standard HTML5 videoplayer for progressive download of video data from the storage location. With this videoplayer you get individual customized features like adding annotations or making snapshots.

EXAMPLES FOR EMBEDDED STREAM TYPES

- Progressive* {Storage path}/{Folder path}/example.mp4
- Progressive* {Storage path}/{Folder path}/example.webm
- Progressive* {Storage path}/{Folder path}/example.ogg

Optimized for AngularJS framework

VIDEOPLAYER PREMIUM PACKAGE

For enterprise business solutions

With big asset management systems you can choose an enterprise videoplayer solution for solving complex video problems. The videoplayer supports faster loading times, better skipping during playback and has smooth bandwidth adaption due to the connection of the storage location. This results in better performance by transferring big video data files from video server to clients.

EXAMPLES FOR EMBEDDED STREAM TYPES

- DASH* {Storage path}/{Folder path}/example.mpd
- HLS* {Storage path}/{Folder path}/example.m3u8
- Smooth* {Storage path}/{Folder path}/example.ism/manifest
- Progressive* {Storage path}/{Folder path}/example.mp4

Optimized for excellent video experience by best cross browser support
